

# Tritan™ Renew

Tritan™ Renew is powered by revolutionary recycling technology that transforms single-use plastic waste into durable materials, offsetting the use of fossil fuels and lowering greenhouse gas emissions.

This innovative material is created through a unique process that breaks down plastic back into its basic chemical building blocks, allowing plastic materials to be recycled again and again. Tritan™ Renew is free of BPA, BPS and BPF chemicals making it suitable for contact with food. It is also odor and taste resistant, highly durable and dishwasher safe. In other words, it is made to last.
